

Dataset Overview

- Records: 4,653
- Features: 9
- Numerical columns: 5
- Categorical columns: 4

Data Quality Checks

Missing Values

- No missing values detected across all columns.

Duplicate Records

- Duplicate rows: 1,889 (40.6% of the dataset).
- This is the primary data quality concern and should be investigated before modeling.

Categorical Features

- Education: 3 categories (Bachelors, Masters, PhD)
- City: 3 categories (Bangalore, Pune, New Delhi)
- Gender: 2 categories (Male, Female)
- EverBenched: 2 categories (Yes, No)
- No inconsistent or unexpected category labels found.

Numerical Features

- Age ranges from 22–41 years.
- JoiningYear ranges from 2012–2018.
- ExperienceInCurrentDomain ranges from 0–7 years.
- No obvious invalid values detected.

Target Variable

- LeaveOrNot = 0 (Stayed)
- LeaveOrNot = 1 (Left)
- Moderate class imbalance.

Summary

The dataset is complete and generally clean, with no missing values and valid feature ranges. The main issue is the high number of duplicate records (40.6%).
