

Findings

1. Workforce Overview

- Total employee count is approximately 3,000 employees.
- Average employee age is 30.95 years.
- Average employee experience is 2.64 years.
- Overall attrition rate is 39.36%, indicating a relatively high employee turnover level.

2. Gender Distribution

- The workforce is relatively balanced:
 - Male: 55.3% (1.53K employees)
 - Female: 44.7% (1.24K employees)
- Male employees slightly outnumber female employees.

3. Education Distribution

- Employees with a Bachelor's degree constitute the majority of the workforce.
- Master's degree holders form the second-largest group.
- PhD holders represent only a small portion of employees.

Attrition by Education

- Employees with Master's degrees show the highest attrition rate.
- Employees with PhDs show the lowest attrition rate.
- Bachelor's degree holders have moderate attrition.

4. City Analysis

Employee Distribution

- Bangalore has the largest employee population.
- Pune and New Delhi have similar employee counts.

Attrition by City

- Pune has the highest attrition rate
- Bangalore and New Delhi have similar and lower attrition rates.

Although Pune has the highest attrition rate, Bangalore contributes almost the same number of exits because of its larger workforce.

5. Payment Tier Analysis

- Employees in Payment Tier 2 exhibit the highest attrition rate.
- Employees in Payment Tier 3 exhibit the lowest attrition rate.
- Payment Tier 1 employees show moderate attrition.

6. Bench Status Analysis

- Employees who were ever benched show a higher attrition rate.
- Employees who were never benched show a lower attrition rate.

7. Age Analysis

- Attrition is highest among employees aged 24–26 years.
- Attrition generally declines as age increases.
- Employees above 35 years show comparatively lower attrition.

8. Experience Analysis

- Employees with around 3 years of experience have the highest attrition rate.
- Employees with around 6 years of experience have the lowest attrition rate.
- Attrition tends to decrease as experience increases beyond 3 years.
